Bombshell: Nobel Prize Winner Reveals – Covid Vaccine is 'Creating Variants'

Renee Nal May 18, 2021

Prof Luc Montagnier said that epidemiologists know but are "silent" about the phenomenon, known as 'Antibody-Dependent Enhancement' (ADE).

While it is understood that viruses mutate, causing variants, French Virologist and Nobel Prize Winner Luc Montagnier contends that "it is the vaccination that is creating the variants."

The 2008 Nobel Laureate made the explosive comments as part of a larger interview with Pierre Barnérias of Hold-Up Media earlier this month. The clip was exclusively translated for RAIR Foundation USA, and is quite damning for the agenda-driven left-wing establishment.

As reported at RAIR in April of last year, Prof Montagnier presented a controversial theory that the virus was created in a lab. His comments at the time offended the left-wing establishment so much that they aggressively attempted to discredit his findings, hence, the media is backpedaling on the origin of the coronavirus after prominent scientists called for further scrutiny.

Vaccines are Creating the Variants

Prof. Montagnier referred to the vaccine program for the coronavirus as an "unacceptable mistake." Mass vaccinations are a "scientific error as well as a medical error," he said. "It is an unacceptable mistake. The history books will show that, because it is the vaccination that is creating the variants," Prof Luc Montagnier continued.

Receiving the Nobel Prize in 2008

The prominent virologist explained that "there are antibodies, created by the vaccine," forcing the virus to "find another solution" or die. This is where the variants are created. It is the variants that "are a production and result from the vaccination."

Antibody-Dependent Enhancement

Prof Montagnier said that epidemiologists know but are "silent" about the phenomenon, known as 'Antibody-Dependent Enhancement' (ADE). In the articles that mention ADE, the concerns expressed by Prof Montagnier are dismissed. "Scientists say that ADE is pretty much a non-issue with COVID-19 vaccines," an article at Medpage Today reported in March.

Prof Montagnier explained that the trend is happening in 'each country' where "the cure of vaccination is followed by the curse of deaths."

The Nobel Laureate's point is emphasized by information revealed in an open letter from a long list of medical doctors to the European Medicines Agency. The letter stated that in the past "there have been numerous media reports from around the world of care homes being struck by COVID-19 within days of vaccination of residents."

Earlier this month, RAIR reported on a statement by French Virologist Christine Rouzioux:

> "...the rise in new cases is occurring in vaccinated patients in nursing homes in Montpellier, in the Sarte, in Rheims, in the Moselle..."

Prof Luc Montagnier continued to say that he is doing his own experiments with those who become infected with the coronavirus after getting the vaccine. "I will show you that there are antibodies that are resistant to the vaccine," he said.

Watch the clip (translated below):

Many thanks to Herta and Miss Piggy for the translation!

(Questions are **bolded***).*

If we look at the curve from the WHO, since the vaccinations started in January, the curve showing new infections (contamination) has exploded, along with deaths.

Notably among young people.

–Yes. With thromboses, etc.

How do you view the mass vaccination program? Mass vaccination compared to treatments that work and aren't expensive.

—It's an enormous mistake, isn't it? A scientific error as well as a medical error. It is an unacceptable mistake. The history books will show that, because it is the vaccination that is creating the variants.

—For the China virus, there are antibodies, created by the vaccine. What does the virus do? Does it die or find another solution?

—The new variants are a production and result from the vaccination. You see it in each country, it's the same: the curve of vaccination is followed by the curve of deaths.

—I'm following this closely and I am doing experiments at the Institute with patients who became sick with the disease after being vaccinated. I will show you that they are creating the variants that are resistant to the vaccine.

Should we be vaccinating during a pandemic?

—It's unthinkable.

—They're silent... many people know this, epidemiologists know it.

—It is the antibodies produced by the virus that enable an infection to become stronger.

—It's what we call Antibody Dependent Enhancement, which means antibodies favor a certain infection. The antibody attaches to the virus, from that moment it has the receptors, the antibodies, we have them in the macrophage etc.

—It pokes the virus and not accidentally, but because of the fact that they're linked to the antibodies.

—It is clear that the new variants are created by antibody-mediated selection due to the vaccination. OK?

Why would you fly on plane that has not been tested but you would inject an experimental vaccine in your body?

All ready there's doctors and professors in the medical field from Harvard and other places trying to discredit and supposedly 'debone' the French Nobel Prize winning doctor. They introduced these doctors with their credentials in from Harvard, Professor from such and such, as to obviously credibility matters. As far as credibility goes the Nobel prize is like a superbowl ring if the superbowl only came around every 5 to 20 years and the French doctor has that. So I'm supposed to accept the empty professors and doctors counter to his argument over the Nobel prize winning discrete?? Yeah I'll go with the Nobel prize winning doctor.

This is very interesting.

I am obsessed with trying to understand COVID19 treatment, immunity, and the vaccines.

I am 70, had COVID in November 2020 and the Moderna vaccine 6 months later because my son is undergoing immunotherapy (mRNA) for Stage 4 cancer. My COVID was bad, but it was over in 10 days. I had no treatment, was at home. The day of my jab I went to the ER with an excruciating headache. When it passed, they sent me home where I could plainly see that my left eye looked like strawberry Jello + a stroke. No more vaccines for me, and the doctor My ER visit was designated a 'Rare Bare. 85. My husband never got COVID, had no reaction to the jab. My two daughters just had COVID (Omicron, supposedly). One was triple jabbed; the other unvaccinated. One lives in Massachusetts, the other in Ohio. My son and family have had colds, but no COVID. My experience inspires my curiosity. There is no observable logic here, except that for some, the vaccine can be lethal. The other plain fact is that it does not stop Omicron.

The general action of a virus is mutating "down." less lethal, more transmissible. There is no known virus that has mutated to a MORE dangerous variant. Therefore, although Luc Montagnier could be right and deserves to be heard, I (who have no credentials whatsoever) believe that indeed, COVID has mutated down. Whether the vaccine negatively impacts the immune system remains to be determined. I also believe Omicron will mark the end to this so-called pandemic.

My prognostication:

Short term, Fauci, Pharma, & politicians will CYA – actually cover "their" – however they must in order to avoid taking responsibility for this whole debacle.

Long term, COVID from funded experimentation through transmission, from lack of recognized treatment & vaccines that are not more than good, from malice to accidental, is seen by historians as an enormous crime against humanity.

Honestly, we dodged a bullet. Next time, it could be the end of us. All of us.

I also have a theory that illness relates to viral load and specific immune strength. Some people can have the virus in nose or throat, but their immune system is strong enough to fight it off. Others, with weaker immune systems, can become deathly ill or expire with the same viral load that has no symptoms in a person with a healthy immune system.

Therefore, the key to survival is a robust immune system and we all know how to do that, don't we?

The future of the medicinal profession lies in maintaining optimum health, not in drugs.

If I was a betting man I would put my money on Dr.Prof.Luc Montagnier in a heartbeat. The MSM is surely on the vaccination of everyone as all we have are paid-vaccine commenters and or Drs. that have been pushing for the pharma complex all there professional careers.Never a peep about prophylactics only big immune vaccines. The establishment/globalists that have been running this scamdemic since it was planned many years ago and not the pandemic announcement in early 2020,are hoping that most will not be able to piece together the big picture.There never was a real pandemic and their method of testing was a hoax from day one .Now they want to vaccinate our children and the whole world for that matter ,man , woman and child to get rid of a virus.It's been done before and it will not succeed this time either. The only way forward is to realize that our own immune system will do the job so much better than anything the pharma mafia will ever be able to .Proper nutritional health with Vit D in seasonal changes of sunlight availability, and other nutrients such as VIT C should be taken daily.VIT C will normally produce naturally etc.

Check out what Geert Vanden Bossche has to say about it.
